DETAILED ACTION

This Application has been examined. The preliminary Amendment filed 2/28/04 has been entered. The original claims 1-15 are pending. The examination results are as follows.

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-15 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The present invention is directed to methods for sequentially driving an array of light emitting diodes (LEDs). Each of the independent claims 1 and 8 requires: in combination with other method steps, the method step c) of floating parts other than the first part of the LEDs; whereas, the closest prior art, the Kawashima patent (U.S. Patent No. 6,650,308), and the Boer patent (U.S. Patent No. 6,608,448) disclose conventional methods for sequentially driving an array of light emitting diodes (LEDs), which, either singularly or in combination, teaches or suggests the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. They are: the Ishizuka patent (U.S. Patent No. 6,714,177), the Lai et al. patent (U.S. Patent No. 6,501,226), and the Okuda et al. patent (U.S. Patent No. 5,844,368), which teaches methods and systems for driving light-emitting display devices.
